Visual Direction

01

REAL PLACES

Actual Hampton Roads locations — Virginia Beach oceanfront, Norfolk skyline, Chesapeake neighborhoods, James River bridges. Never generic stock suburbs or unnamed cities.

02

NATURAL LIGHT

Clean, natural photography. Golden hour for exteriors. Bright and airy interiors. No heavy HDR, no over-saturated skies. Honest representation of homes and neighborhoods.

03

REAL PEOPLE

Authentic portraits. Barry and the team as themselves — no stiff corporate headshots. Candid moments with clients. Diverse Hampton Roads community represented accurately.

04

DARK ANCHORS

When overlaying text on photos, use the Deep Navy (#0F1D2E) or Deep Teal (#0D2624) as semi-transparent overlays — never a generic black gradient. Minimum 60% opacity.

05

QUIET LUXURY

Restrained elegance over flash. Clean compositions with breathing room. The Silver Gray (#C9C9C9) accent line is the only metallic note. No glitter, no gold borders, no shimmer effects.

06

CONSISTENCY

All team-generated graphics use the two-font system and four-color palette. No third-party template fonts or off-palette colors, regardless of the platform or tool being used to create them.
